

Delta Global Gold Producers Portfolio

SERIES 2

UNIT INVESTMENT TRUSTS

Investment Objective and Principal Investment Strategy

The Delta Global Gold Producers Portfolio, Series 2 ("Trust") seeks to provide total return primarily through capital appreciation. Under normal circumstances, the Trust will invest at least 80% of the value of its assets in securities of companies that derive a majority of their revenues from activities relating to the mining and distribution of gold. The Sponsor has selected Delta Global Advisors, Inc. ("Delta Global") to serve as the Trust's portfolio consultant. The portfolio consultant is responsible for assisting the Sponsor with the selection of the Trust's portfolio and providing ongoing support related to the securities in the portfolio. The Sponsor, with the assistance of Delta Global, has selected stocks for the Trust that it believes have the potential to achieve the Trust's investment objective.

PORTFOLIO ALLOCATION

China	10.82%
United States	7.06%
Jersey	7.03%
Papua New Guinea	6.05%
TOTAL	100.00%

Security Selection

The Sponsor has selected securities from companies that derive a majority of their revenues from activities relating to the mining and distribution of gold. Only those companies whose sole mining focus is on the extraction and sale of gold are considered. Delta Global believes that these companies are most likely to benefit from an environment of increasing prices for gold, as opposed to base metals and other precious metals, which can be economically-cyclical in nature.

The Trust portfolio is globally diversified. The selection process utilizes a traditional top-down approach. The company weightings are based on market cap, current production levels, development pipeline, cash costs and overall financial health. The weighting system is based, when possible, on past performance during inflationary periods.

Long-Term Strategy

This UIT is part of a long-term strategy. Please consider your ability to invest in successive portfolios, if available, at the applicable sales charge. Call your financial professional today or visit claymore.com to learn more.

Why Delta Global Gold Producers?

According to Delta Global, labor cost decreases and lower energy prices may contribute to lower production costs for gold mining and distribution companies. This scenario combined with an increased demand for gold could benefit the strongest gold mining companies in Delta Global's opinion. Industry attributes supporting their outlook include:

- **Limited supply:** As of 2005, estimates placed remaining gold reserves at over 22,000 metric tons, according to Metal Economics Group.¹ For comparison, it was estimated that as of 2006, 158,000 metric tons of gold had ever been mined, of which 65% had been mined since 1950.¹
- **Barriers to entry:** A relatively scarce mineral, gold production is capital intensive and new mines may take up to 10 years to be productive.¹
- **Alternative Currency:** At a time when investors are increasingly questioning the outlook for the value of the U.S. dollar, Delta Global believes that gold may increasingly be looked at as an attractive hedge against a potential decline in the value of the dollar.
- **Historical performance:** Gold mining stocks, as represented by the AMEX Gold Bugs Index, outperformed the Dow Jones Industrial Average, S&P 500 Index and Nasdaq Composite Index over the past ten years.²

As a globally diversified and professionally selected portfolio, the Trust may offer investors a way to own gold producing companies without the volatility associated with owning individual mining company stocks.

Past performance does not guarantee future results. There is no guarantee that these trends and projections will continue or come to fruition and they are subject to change.

INDEX DEFINITIONS: Below are definitions of the indices referenced in this fact card. These indices are unmanaged and it is not possible to invest directly in these indices. **The AMEX Gold Bugs Index ("HUI")** is a modified equal dollar weighted index of companies involved in gold mining. The HUI Index was designed to provide significant exposure to near term movements in gold prices by including companies that do not hedge their gold production beyond 1.5 years. **The Dow Jones Industrial Average** is a price-weighted average of 30 actively traded blue chip stocks, primarily industrials including stocks that trade on the New York Stock Exchange. **The S&P 500 Index** is a capitalization-weighted index of 500 stocks. The index is designed to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries. **The Nasdaq Composite Index** is a broad-based capitalization weighted index of stocks in all three NASDAQ tiers: Global Select, Global Market and Capital Market.

RISK CONSIDERATIONS As with all investments, you may lose some or all of your investment in the Trust. No assurance can be given that the Trust's investment objective will be achieved. The Trust also might not perform as well as you expect. This can happen for reasons such as these: **Securities prices can be volatile.** The value of your investment may fall over time. Market value fluctuates in response to various factors. These can include stock market movements, purchases or sales of securities by the Trust, government policies, litigation, and changes in interest rates, inflation, the financial condition of the securities' issuer or even perceptions of the issuer. Units of the Trust are not deposits of any bank and are not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. **Due to the current state of the economy, the value of the**

GG	Goldcorp, Inc.	2899 HK	Zijin Mining Group Company, Limited
HMV	Harmony Gold Mining Company Limited		
KGC	Kinross Gold Corporation		

RISK CONSIDERATIONS (CONTINUED) securities held by the Trust may be subject to steep declines or increased volatility due to changes in performance or perception of the issuers. In the last year, economic activity has declined across all sectors of the economy, and the United States is experiencing increased unemployment. The current economic crisis has affected the global economy with European and Asian markets also suffering historic losses. Extraordinary steps have been taken by the governments of several leading economic countries to combat the economic crisis; however, the impact of these measures is not yet known and cannot be predicted. **Share prices or dividend rates on the securities in the Trust may decline during the life of the Trust.** There is no guarantee that the issuers of the securities will declare dividends in the future and, if declared, whether they will remain at current levels or increase over time. **The Trust includes securities issued by companies involved in the metals and mining business.** Risks of investing in metals and mining company stocks include inaccurate estimates of mineral reserves and future production levels, varying expectations of mine production costs, technological and operational hazards in mining and mine development activities and mandated expenditures for safety and pollution control devices. **The Trust includes securities issued by companies involved in the precious metals business.** Precious metals companies are subject to risks associated with the exploration, development and production of precious metals including competition for land and difficulties in obtaining required governmental approval to mine land. In addition, the price of gold and other precious metals is subject to wide fluctuations and may be influenced by limited markets, expected inflation, central bank demand and availability of substitutes. **The Trust includes securities issued by companies involved with the production of certain commodities.** Commodity companies include those basic materials companies involved in the production of building materials, aluminum, non-ferrous metals, precious metals and steel, as well as companies that explore for, produce, refine, distribute or sell petroleum or gas products. General risks of commodity companies include price and supply fluctuations, excess capacity, economic recession, government regulations and overall capital spending rates. **The Trust includes securities of companies in the basic materials sector.** General risks of companies in the basic materials sector include the general state of the economy, consolidation, domestic and international politics and excess capacity. In addition, basic materials companies may also be significantly affected by volatility of commodity prices, import controls, worldwide competition, liability for environmental damage, depletion of resources and mandated expenditures for safety and pollution control devices. **The Trust invests in securities issued by small-capitalization and mid-capitalization companies.** These securities customarily involve more investment risk than securities of larger capitalization companies. Small-capitalization and mid-capitalization companies may have limited product lines, markets or financial resources and may be more vulnerable to adverse general market or economic developments. **The Trust invests in American Depositary Receipts ("ADRs") and foreign securities.** The Trust's investment in ADRs and foreign securities presents additional risk. ADRs are issued by a bank or trust company to evidence ownership of underlying securities issued by foreign corporations. Securities of foreign issuers present risks beyond those of domestic securities. More specifically, foreign risk is the risk that foreign securities will be more volatile than U.S. securities due to such factors as adverse economic, currency, political, social or regulatory developments in a country, including government seizure of assets, excessive taxation, limitations on the use or transfer of assets, the lack of liquidity or regulatory controls with respect to certain industries or differing legal and/or accounting standards. **The Trust includes securities issued by companies headquartered or incorporated in countries considered to be emerging markets.** Emerging markets are generally defined as countries with low per capita income in the initial stages of their industrialization cycles. Risks of investing in developing or emerging countries include the possibility of investment and trading limitations, liquidity concerns, delays and disruptions in settlement transactions, political uncertainties and dependence on international trade and development assistance. Companies headquartered in emerging market countries may be exposed to greater volatility and market risk. **The Trust includes securities whose value may be dependent on currency exchange rates.** The U.S. dollar value of these securities may vary with fluctuations in foreign exchange rates. Most foreign currencies have fluctuated widely in value against the U.S. dollar for various economic and political reasons such as the activity level of large international commercial banks, various central banks, speculators, hedge funds and other buyers and sellers of foreign currencies. **Inflation may lead to a decrease in the value of assets or income from investments. The Sponsor does not actively manage the portfolio.** The Trust will generally hold, and may continue to buy, the same securities even though a security's outlook, market value or yield may have changed. **Please see the Trust prospectus for more complete risk information.**

UITs are fixed and not actively managed. An investment in this fixed portfolio should be made with an understanding of the risks involved with owning various types of investments. Industry predictions may not materialize and securities selected for the Trust may not participate in overall industry growth, if any. There is no guarantee that the portfolio will achieve its investment objective. Units, when redeemed, may be worth more or less than their original purchase price.

This UIT is part of a long-term strategy, and investors should consider their ability to invest in successive portfolios, if available, at the applicable sales charge. There are tax consequences associated with an investment from one series to the next. Investors should consult their tax advisor to determine tax consequences associated with an investment from one portfolio to the next. Units of the portfolio may be well suited for purchase by Individual Retirement Accounts or other qualified retirement plans. Consult an attorney or tax advisor regarding tax consequences associated with the purchase of units. Claymore Securities, Inc. does not offer tax advice.

PORTFOLIO SUMMARY

Inception Date	October 28, 2009
Termination Date	November 16, 2011
Initial Offer Price	\$10.00
Minimum Investment	\$250.00
Number of Issues	16
Historical Annual Dividend Distribution	\$0.0200
Distributions*	25th day of each month commencing on November 25, 2009, if any

* The amount of distributions of the Trust may be lower or greater than the above-stated amount due to certain factors that may include, but are not limited to, a change in the dividends paid by issuers, a change in Trust expenses or the sale or maturity of securities in the portfolio. Fees and expenses of the Trust may vary as a result of a variety of factors including the Trust's size, redemption activity, brokerage and other transaction costs and extraordinary expenses.

TICKETING INFORMATION

CUSIP (cash payment)	18387F523
CUSIP (reinvestment accounts)	18387F531
CUSIP (fee-cash)	18387F549
CUSIP (fee-reinvest)	18387F556
Ticker	CDGLBX

SALES CHARGES

Sales Charge ("S/C") is based on a \$10 per unit offering price.

	Amount Per Unit	Max Per Unit %
Up-front S/C	\$0.100	1.00%
Year One Deferred S/C	\$0.245	2.45%
Creation and Development ("C&D") Fee	\$0.050	0.50%
Total S/C	\$0.395	3.95%

The deferred sales charge ("DSC") will be deducted in monthly installments on the last business day commencing July 2010 and ending September 2010. If units are redeemed prior to the DSC period, the entire DSC will be collected.

For unit prices other than \$10, percentages of initial sales charge, C&D fees, and deferred sales charges will vary. Early redemption of units will still cause payment of the deferred sales charge.

VOLUME DISCOUNT BREAKPOINTS

Purchase Amount	Sales Charge Reductions (as a % of the Public Offering Price)
Less than \$50,000	0.00%
\$50,000 - \$99,999	0.25%
\$100,000 - \$249,999	0.50%
\$250,000 - \$499,999	0.75%
\$500,000 - \$999,999	1.00%
\$1,000,000 or more	1.50%
