SUPPLEMENT TO THE CURRENTLY EFFECTIVE PROSPECTUS AND STATEMENT OF ADDITIONAL INFORMATION FOR THE ABOVE LISTED FUNDS:

The following paragraphs are hereby inserted in the "Investment Advisory Services" section in each Fund's Prospectus at the end of the sub-section "Investment Adviser" and in the "Management" section in each Fund's Statement of Additional Information in the sub-section "Investment Advisory Agreement" (each in place of, where applicable, the current corresponding discussion therein):

On July 17, 2009, Claymore Group Inc., the parent of the Investment Adviser, entered into an Agreement and Plan of Merger between and among Claymore Group Inc., Claymore Holdings, LLC and GuggClay Acquisition, Inc., (with the latter two entities being wholly-owned, indirect subsidiaries of Guggenheim Partners, LLC ("Guggenheim")) whereby GuggClay Acquisition, Inc. will merge into Claymore Group Inc. which will be the surviving entity. The parties intend that the completed merger will result in a change-of-control whereby Claymore Group Inc. and its subsidiaries, including the Investment Adviser, will become indirect, wholly-owned subsidiaries of Guggenheim. The transaction is not expected to affect the daily operations of the Funds or the investment management activities of the Investment Adviser. The transaction closed on October 14, 2009 (such closing date being the "Effective Date").

Under the 1940 Act, consummation of this transaction resulted in the automatic termination of the Advisory Agreement. Accordingly, on September 28, 2009, the Board of Trustees approved an interim investment advisory agreement between the Trust and the Investment Adviser (the "Interim Advisory Agreement"). The Interim Advisory Agreement took effect as of the Effective Date and will terminate upon the earlier of: (a) 150 calendar days after the Effective Date or (b) the approval of a new investment advisory agreement by the shareholders of each Fund. In addition, the advisory fees earned by the Investment Adviser pursuant to the Interim Advisory Agreement will be held in an interest-bearing escrow account with the Trust's custodian during the term of the Interim Advisory Agreement. If a Fund's shareholders approve a new advisory agreement with the Investment Adviser prior to the expiration of the term of the Interim Advisory Agreement, the amount in the escrow account (including any interest earned) with respect to the Fund shall be paid to the Investment Adviser. If a Fund's shareholders do not approve a new advisory agreement with the Investment Adviser prior to the expiration of the term of the Interim Advisory Agreement, the Investment Adviser shall be paid, out of the escrow account with respect to the Fund, the lesser of (i) the Investment Adviser's costs incurred in providing the services under the Interim Advisory Agreement (including any interest earned on that amount while in escrow) with respect to the Fund; or (ii) the total amount in the escrow account (including any interest earned) with respect to the Fund. Other than the effective dates and the provisions set forth above regarding the advisory fees' placement into an escrow account, the terms and conditions of the Interim Advisory Agreement are substantively identical to those of the Advisory Agreement.

On September 28, 2009, the Board of Trustees also approved a new investment advisory agreement between the Trust and the Investment Adviser (the "New Advisory Agreement") and recommended that the New Advisory Agreement be submitted to the shareholders of each Fund for their approval. The New Advisory Agreement will take effect with respect to each Fund upon its approval by the shareholders of each Fund and will have an initial term of one year. Thereafter, the New Advisory Agreement will continue in effect only if its continuance is approved by the Board of Trustees. Other than effective dates, the terms and conditions of the New Advisory Agreement are substantively identical to those of the Advisory Agreement.

Supplement to the currently effective Prospectus for the above listed Funds:

The following paragraphs are hereby added to the "Investment Advisory Services" section in each Fund's Prospectus at the end of the sub-section "Investment Adviser":

On July 17, 2009, Claymore Group Inc., the parent of the Investment Adviser, entered into an Agreement and Plan of Merger between and among Claymore Group Inc., Claymore Holdings, LLC and GuggClay Acquisition, Inc., (with the latter two entities being wholly-owned, indirect subsidiaries of Guggenheim Partners, LLC ("Guggenheim")) whereby GuggClay Acquisition, Inc. will merge into Claymore Group Inc. which will be the surviving entity. The parties intend that the completed merger will result in a change-of-control whereby Claymore Group Inc. and its subsidiaries, including the Investment Adviser, will become indirect, wholly-owned subsidiaries of Guggenheim. The transaction is not expected to affect the daily operations of the Funds or the investment management activities of the Investment Adviser.

Under the 1940 Act, consummation of this transaction will result in the automatic termination of the Advisory Agreement. Accordingly, prior to such consummation, the Trust expects to enter into a new investment advisory agreement with the Investment Adviser, to become effective upon the consummation of the transaction. This new investment advisory agreement will be subject to the initial approval of the Board of Trustees and subsequent approval by each Fund's shareholders.

Introduction—Claymore Exchange-Traded Fund Trust 2

The Claymore Exchange-Traded Fund Trust 2 (the “Trust”) is an investment company consisting of 14 separate exchange-traded “index funds.” The investment objective of each of the funds is to replicate as closely as possible, before fees and expenses, the performance of a specified market index. Claymore Advisors, LLC is the investment adviser for the funds (the “Investment Adviser”).

This prospectus relates to one fund of the Trust, the Claymore/NYSE Arca Airline ETF (the “Fund”).

The Fund has applied to list its shares (the “Shares”), subject to notice of issuance, on the NYSE Arca, Inc. (the “NYSE Arca”). The Fund’s Shares will trade at market prices that may differ to some degree from the net asset value (“NAV”) of the Shares. Unlike conventional mutual funds, the Fund issues and redeems Shares on a continuous basis, at NAV, only in large specified blocks of 50,000 Shares, each of which is called a “Creation Unit.” Creation Units are issued and redeemed principally in-kind for securities included in a specified index. **Except when aggregated in Creation Units, Shares are not redeemable securities of the Fund.**

Who Should Invest

The Fund is designed for investors who seek a relatively low-cost “passive” approach for investing in a portfolio of equity securities of companies in a specified index. The Fund may be suitable for long-term investment in the market represented by a specified index and may also be used as an asset allocation tool or as a speculative trading instrument.

Tax-Advantaged Product Structure

Unlike interests in many conventional mutual funds, the Shares are traded throughout the day on a national securities exchange, whereas mutual fund interests are typically only bought and sold at closing net asset values. The Shares have been designed to be tradable in the secondary market on a national securities exchange on an intra-day basis, and to be created and redeemed principally in-kind in Creation Units at each day's next calculated NAV. These arrangements are designed to protect ongoing shareholders from adverse effects on the Fund's portfolios that could arise from frequent cash creation and redemption transactions. In a conventional mutual fund, redemptions can have an adverse tax impact on taxable shareholders because of the mutual fund's need to sell portfolio securities to obtain cash to meet fund redemptions. These sales may generate taxable gains for the shareholders of the mutual fund, whereas the Shares' in-kind redemption mechanism generally will not lead to a tax event for the Fund or its ongoing shareholders.

Claymore/NYSE Arca Airline ETF

Investment Objective

The Fund seeks investment results that correspond generally to the performance, before the Fund's fees and expenses, of an equity index called the NYSE Arca Global Airline Index (the "Airline Index" or the "Index"). The Fund's investment objective is not fundamental and may be changed by the Board of Trustees without shareholder approval.

Primary Investment Strategies

The Fund, using a low cost "passive" or "indexing" investment approach, will seek to replicate, before the Fund's fees and expenses, the performance of the Airline Index. The Airline Index is a modified equal-dollar weighted Index designed to measure the performance of highly capitalized and liquid U.S. and international passenger airline companies identified as being in the airline industry, as defined below, and listed on developed and emerging global market exchanges. The Fund's Index Provider, Archipelago Holdings Inc. ("Arca" or the "Index Provider"), an affiliate of NYSE Euronext, Inc., defines "developed markets" as countries with western-style legal systems, transparent financial rules for financial reporting and sophisticated, liquid and accessible stock exchanges with readily-exchangeable currencies. As of the date of this prospectus, the market capitalizations of stocks included in the Index range from approximately \$700 million to \$9 billion, which includes small-, mid- and large-capitalization stocks as defined by the Index Provider. The Fund will at all times invest at least 80% of its total assets in common stock, American depository receipts ("ADRs") and global depository receipts ("GDRs") that comprise the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of the component securities that comprise the Index. The Fund has adopted a policy that requires the Fund to provide shareholders with at least 60 days notice prior to any material change in this policy or the Index. The Board of Trustees of the Trust may change the Fund's investment strategy and other policies without shareholder approval, except as otherwise indicated.

The Investment Adviser seeks a correlation over time of 0.95 or better between the Fund's performance and the performance of the Index. A figure of 1.00 would represent perfect correlation.

The Fund generally will invest in all of the securities comprising the Index in proportion to their weightings in the Index. However, under various circumstances, it may not be possible or practicable to purchase all of the securities in the Index in those weightings. In those circumstances, the Fund may purchase a sample of the securities in the Index in proportions expected by the Investment Adviser to replicate generally the performance of the Index as a whole. There may also be instances in which the Investment Adviser may choose to overweight another security in the Index, purchase (or sell) securities not in the Index which the Investment Adviser believes are appropriate to substitute for one or more Index components, or utilize various combinations of other available investment techniques, in seeking to accurately track the Index. In addition, from time to time securities are added to or removed from the Index. The Fund may sell securities that are represented in the Index or purchase securities that are not yet represented in the Index in anticipation of their removal from or addition to the Index.

Index Methodology

As of the date of this prospectus, the Index consists of 25 companies in the airline industry. The Index Provider defines the airline industry as companies that are identified as being in the airline industry by recognized company classification systems (defined as systems that are developed and maintained by industry organizations that classify companies into pre-defined categories based upon business activities, source of revenues, and other such company metrics), and that derive at least 50% of their revenue from passenger airline operations based on the company's public filings.

Index Construction

Arca applies the following criteria to each company included in the universe of potential Index constituents in constructing the Index:

1. All publicly-traded companies (whether located in developed markets or emerging markets) classified as being in the passenger airline industry by a recognized classification system are identified as described above.
2. Companies that are so identified are evaluated (via a review of the company's public filings) to determine whether they generate at least 50% of their revenue from passenger airline operations. Companies that are not identified as being in the passenger airline industry and that do not generate a majority of their revenue from passenger airline operations are excluded from consideration as an Index constituent.
3. The remaining securities are evaluated to ensure that they are listed on a U.S. national exchange or an international exchange that provides "last sale reporting," defined below (which may include exchanges in developed or emerging markets), have a minimum market capitalization greater than or equal to \$100 million at the reference date preceding each reconstitution and have a 100-day average daily trading value of not less than \$1 million at the reference date preceding each reconstitution. Securities that meet these requirements are included as an Index constituent while securities that do not meet these exchange, liquidity and market capitalization criteria are excluded from the Index. "Last sale reporting" is a requirement that securities transactions be reported (usually including the number of shares and the price at which the transaction was executed), generally to a central reporting facility, within a specified period of time following the completion of the transaction.
4. A modified equal-dollar weighting methodology is applied to determine the weightings of Index constituents. The weighting is modified based on the liquidity and size of the components within Index. The Index is divided into four weighting groups based on domicile and liquidity. Weighting is first split between domestically domiciled airlines and internationally domiciled airlines, with 70% going to domestic and 30% to international. The top three Index components in each of these two categories, ranked by 100-day average trading dollar value and market capitalization, are each weighted 15% for domestic airlines and 4.5% for international airlines. The remaining aggregate Index weight, 25% for domestic and 16.5% for international, is equally applied amongst the remaining Index components within each domicile group.
5. The Index is reconstituted and rebalanced quarterly, except in the event of certain corporate actions such as the payment of a dividend, other than an ordinary cash

dividend, stock distribution, stock split, reverse stock split, rights offering, or a distribution, reorganization, recapitalization, or some such similar event with respect to a component stock. When the Index is adjusted between quarterly reviews for such events, the number of shares of the relevant security will be adjusted to the nearest whole share to maintain the component's relative weight in the Index at the level immediately prior to the corporate action. The Index may also be adjusted between quarterly reviews in the event of a merger, consolidation, dissolution, or liquidation of an issuer of a component stock. In the event that a replacement is needed for an Index constituent prior to the next quarterly rebalance, the replacement constituent will be added at the weight of the constituent that is being removed from the Index, rounded to the nearest whole share.

Primary Investment Risks

Investors should consider the following risk factors and special considerations associated with investing in the Fund, which may cause you to lose money.

Investment Risk. An investment in the Fund is subject to investment risk, including the possible loss of the entire principal amount that you invest.

Equity Risk. A principal risk of investing in the Fund is equity risk, which is the risk that the value of the securities held by the Fund will fall due to general market and economic conditions, perceptions regarding the industries in which the issuers of securities held by the Fund participate, or factors relating to specific companies in which the Fund invests. For example, an adverse event, such as an unfavorable earnings report, may depress the value of equity securities of an issuer held by the Fund; the price of common stock of an issuer may be particularly sensitive to general movements in the stock market; or a drop in the stock market may depress the price of most or all of the common stocks and other equity securities held by the Fund. In addition, common stock of an issuer in the Fund's portfolio may decline in price if the issuer fails to make anticipated dividend payments because, among other reasons, the issuer of the security experiences a decline in its financial condition. Common stock is subordinated to preferred stocks, bonds and other debt instruments in a company's capital structure, in terms of priority to corporate income, and therefore will be subject to greater dividend risk than preferred stocks or debt instruments of such issuers. In addition, while broad market measures of common stocks have historically generated higher average returns than fixed income securities, common stocks have also experienced significantly more volatility in those returns.

Airline Industry Risk. Companies in the airline industry may be adversely affected by a downturn in economic conditions that can result in decreased demand for air travel. Due to the discretionary nature of business and leisure travel spending, airline industry revenues are heavily influenced by the condition of the U.S. economy and economies in other regions of the world. Airline companies may also be significantly affected by changes in fuel prices, which may be very volatile. Due to the competitive nature of the airline industry, airline companies may not be able to pass on increased fuel prices to customers by increasing fares. The airline industry may also be significantly affected by changes in labor relations and insurance costs. The trend in the United States has been to deregulate the transportation industry, which could have a favorable long-term effect, but future government decisions could adversely affect companies in the airline industry.

Foreign Investment Risk. The Fund's investments in non-U.S. issuers may involve unique risks compared to investing in securities of U.S. issuers, including, among others, greater market volatility than U.S. securities and less complete financial information than for U.S. issuers. In addition, adverse political, economic or social developments could undermine the value of the Fund's investments or prevent the Fund from realizing the full value of its investments. Financial reporting standards for companies based in foreign markets differ from those in the United States. Finally, the value of the currency of the country in which the Fund has invested could decline relative to the value of the U.S. dollar, which may affect the value of the investment to U.S. investors. In addition, the underlying issuers of certain depositary receipts, particularly unsponsored or unregistered depositary receipts, are under no obligation to distribute shareholder communications to the holders of such receipts, or to pass through to them any voting rights with respect to the deposited securities.

Emerging market countries are countries that major international financial institutions, such as the World Bank, generally consider to be less economically mature than developed nations. Emerging market countries can include every nation in the world except the United States, Canada, Japan, Australia, New Zealand and most countries located in Western Europe. Investing in foreign countries, particularly emerging market countries, entails the risk that news and events unique to a country or region will affect those markets and their issuers. Countries with emerging markets may have relatively unstable governments, may present the risks of nationalization of businesses, restrictions on foreign ownership and prohibitions on the repatriation of assets. The economies of emerging markets countries also may be based on only a few industries, making them more vulnerable to changes in local or global trade conditions and more sensitive to debt burdens or inflation rates. Local securities markets may trade a small number of securities and may be unable to respond effectively to increases in trading volume, potentially making prompt liquidation of holdings difficult or impossible at times.

Small and Medium-Sized Company Risk. Investing in securities of small and medium-sized companies involves greater risk than is customarily associated with investing in more established companies. These companies' securities may be more volatile and less liquid than those of more established companies. These securities may have returns that vary, sometimes significantly, from the overall stock market.

Non-Correlation Risk. The Fund's return may not match the return of the Index for a number of reasons. For example, the Fund incurs a number of operating expenses not applicable to the Index, and incurs costs in buying and selling securities, especially when rebalancing the Fund's securities holdings to reflect changes in the composition of the Index.

The Fund may not be fully invested at times, either as a result of cash flows into the Fund or reserves of cash held by the Fund to meet redemptions and expenses. If the Fund utilizes a sampling approach or futures or other derivative positions, its return may not correlate as well with the return on the Index, as would be the case if it purchased all of the securities in the Index with the same weightings as the Index.

Replication Management Risk. Unlike many investment companies, the Fund is not "actively" managed. Therefore, it would not necessarily sell a security because the security issuer was in financial trouble unless that security is removed from the Index.

Issuer-Specific Changes. The value of an individual security or particular type of security can be more volatile than the market as a whole and can perform differently from the value of

the market as a whole. The value of securities of smaller issuers can be more volatile than that of larger issuers.

Non-Diversified Fund Risk. The Fund is considered non-diversified and can invest a greater portion of assets in securities of individual issuers than a diversified fund. As a result, changes in the market value of a single investment could cause greater fluctuations in share price than would occur in a diversified fund.

Fund Performance

As of the date of this Prospectus, the Fund has not yet completed a full calendar year of investment operations. When the Fund has completed a full calendar year of investment operations, this section will include charts that show annual total returns, highest and lowest quarterly returns and average annual total returns (before and after taxes) compared to a benchmark index selected for the Fund.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. Investors purchasing Shares in the secondary market will not pay the shareholder fees shown below, but may be subject to costs (including customary brokerage commissions) charged by their broker.

Shareholder Fees (paid directly by Authorized Participants)	
Sales charges (loads)	None
Standard creation/redemption transaction fee per order ⁽¹⁾	\$500
Maximum additional creation/redemption transaction fee per order ⁽¹⁾	\$2,000
Annual Fund Operating Expenses ⁽²⁾⁽³⁾ (expenses that are deducted from Fund assets)	
Management Fees	0.50%
Distribution and service (12b-1) fees ⁽⁴⁾	– %
Other expenses ⁽⁵⁾	0.52%
Total annual Fund operating expenses	1.02%
Expense Waiver and Reimbursements ⁽⁶⁾	0.22%
Net Operating Expenses	0.80%

¹ Purchasers of Creation Units and parties redeeming Creation Units must pay a standard creation or redemption transaction fee of \$500. If a Creation Unit is purchased or redeemed for cash, a variable fee of up to four times the standard creation or redemption transaction fee may be charged. See the following discussion of “Creation Transaction Fees and Redemption Transaction Fees.”

² The Fund had not commenced operations as of the date of this Prospectus. The expenses listed in the table are estimates based on the expenses the Fund expects to incur for the fiscal year ending August 31, 2009.

³ Expressed as a percentage of average net assets.

⁴ The Fund has adopted a Distribution and Service (12b-1) Plan pursuant to which the Fund may bear a 12b-1 fee not to exceed 0.25% per annum of the Fund’s average daily net assets. However, no such fee is currently paid by the Fund.

⁵ Other expenses have been estimated for the Fund’s initial fiscal year assuming net assets of \$50 million. Such expenses may be higher if the Fund’s net assets total less than \$50 million at the end of its initial fiscal year, or lower if the Fund’s net assets exceed \$50 million at the end of its initial fiscal year.

⁶ The Fund’s Investment Adviser has contractually agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding interest expenses, a portion of the Fund’s licensing fees, offering costs up to 0.25% of the Fund’s average net assets, brokerage commissions and other trading expenses, taxes and extraordinary expenses such as litigation and other expenses not incurred in the ordinary course of the Fund’s business) from exceeding 0.65% of average net assets per year, at least until December 31, 2011. The offering costs excluded from the 0.65% expense cap are: (a) legal fees pertaining to the Fund’s Shares offered for sale; (b) SEC and state registration fees; and (c) initial fees paid to be listed on an exchange. The Trust and the Investment Adviser have entered into an Expense Reimbursement Agreement (the “Expense Agreement”) in which the Investment Adviser has agreed to waive its management fees and/or pay certain operating expenses of the Fund in order to maintain the expense ratio of the Fund at or below 0.65% (excluding the expenses set forth above) (the “Expense Cap”). For a period of five years subsequent to the Fund’s commencement of operations, the Investment Adviser may recover from the Fund fees and expenses waived or reimbursed during the prior three years if the Fund’s expense ratio, including the recovered expenses, falls below the Expense Cap.

Example

The following example is intended to help you compare the cost of investing in the Fund with the costs of investing in other funds. This example does not take into account transaction fees on purchases and redemptions of Creation Units of the Fund or customary brokerage commissions that you may pay when purchasing or selling Shares of the Fund.

The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same each year. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

One Year	Three Years
\$82	\$255

Creation Transaction Fees and Redemption Transaction Fees

The Fund issues and redeems Shares at NAV only in large blocks of 50,000 Shares (each block of 50,000 Shares called a "Creation Unit") or multiples thereof. As a practical matter, only broker-dealers or large institutional investors with creation and redemption agreements and called Authorized Participants ("APs") can purchase or redeem these Creation Units. Purchasers of Creation Units at NAV must pay a standard Creation Transaction Fee of \$500 per transaction. The value of a Creation Unit as of first creation was approximately \$1,250,000. An AP who holds Creation Units and wishes to redeem at NAV would also pay a standard Redemption Fee of \$500 per transaction (see "How to Buy and Sell Shares" later in this Prospectus). APs who hold Creation Units in inventory will also pay the Annual Fund Operating Expenses described in the table above. Assuming an investment in a Creation Unit of \$1,250,000 and a 5% return each year, and assuming that the Fund's gross operating expenses remain the same, the total costs would be \$10,710 if the Creation Unit is redeemed after one year, and \$32,434 if the Creation Unit is redeemed after three years.

If a Creation Unit is purchased or redeemed outside the usual process through the National Securities Clearing Corporation or for cash, a variable fee of up to four times the standard Creation or Redemption Transaction Fee may be charged to the AP making the transaction.

The creation fee, redemption fee and variable fee are not expenses of the Fund and do not impact the Fund's expense ratio.

Secondary Investment Strategies

As a primary investment strategy, the Fund will at all times invest at least 80% of its total assets in component securities that comprise the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of the component securities that comprise the Index. As secondary investment strategies, the Fund may invest its remaining assets in money market instruments, including repurchase agreements or other funds which invest exclusively in money market instruments, convertible securities, structured notes (notes on which the amount of principal repayment and interest payments are based on the movement of one or more specified factors, such as the movement of a particular stock or stock index), forward foreign currency exchange contracts and in swaps, options and futures contracts. Swaps, options and futures contracts (and convertible securities and structured notes) may be used by the Fund in seeking performance that corresponds to its Index, and in managing cash flows. The Fund will not invest in money market instruments as part of a temporary defensive strategy to protect against potential stock market declines. The Investment Adviser anticipates that it may take approximately three business days (i.e., each day the NYSE Arca is open) for additions and deletions to the Fund's Index to be reflected in the portfolio composition of the Fund.

The Fund may borrow money from a bank up to a limit of 10% of the value of its assets, but only for temporary or emergency purposes.

The Fund may lend its portfolio securities to brokers, dealers and other financial institutions desiring to borrow securities to complete transactions and for other purposes. In connection with such loans, the Fund receives liquid collateral equal to at least 102% of the value of the portfolio securities being lent. This collateral is marked to market on a daily basis.

The policies described herein constitute non-fundamental policies that may be changed by the Board of Trustees of the Trust without shareholder approval. Certain other fundamental policies of the Fund are set forth in the Statement of Additional Information under "Investment Restrictions."

Additional Risk Considerations

In addition to the risks described previously, there are certain other risks related to investing in the Fund.

Trading Issues. Trading in Shares on the NYSE Arca may be halted due to market conditions or for reasons that, in the view of the NYSE Arca, make trading in Shares inadvisable. In addition, trading in Shares on the NYSE Arca is subject to trading halts caused by extraordinary market volatility pursuant to the NYSE Arca “circuit breaker” rules. There can be no assurance that the requirements of the NYSE Arca necessary to maintain the listing of the Fund will continue to be met or will remain unchanged.

Fluctuation of Net Asset Value. The NAV of the Fund’s Shares will generally fluctuate with changes in the market value of the Fund’s holdings. The market prices of the Shares will generally fluctuate in accordance with changes in NAV as well as the relative supply of and demand for the Shares on the NYSE Arca. The Investment Adviser cannot predict whether the Shares will trade below, at or above their NAV. Price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for the Shares will be closely related to, but not identical to, the same forces influencing the prices of the stocks of the Index trading individually or in the aggregate at any point in time.

However, given that the Shares can be purchased and redeemed in Creation Units (unlike shares of many closed-end funds, which frequently trade at appreciable discounts from, and sometimes premiums to, their NAV), the Investment Adviser believes that large discounts or premiums to the NAV of the Shares should not be sustained.

Securities Lending. Although the Fund will receive collateral in connection with all loans of its securities holdings, the Fund would be exposed to a risk of loss should a borrower default on its obligation to return the borrowed securities (e.g., the loaned securities may have appreciated beyond the value of the collateral held by the Fund). In addition, the Fund will bear the risk of loss of any cash collateral that it invests.

Leverage. To the extent that the Fund borrows money, it may be leveraged. Leveraging generally exaggerates the effect on NAV of any increase or decrease in the market value of the Fund’s portfolio securities.

These risks are described further in the Statement of Additional Information.

Investment Advisory Services

Investment Adviser

Claymore Advisors, LLC, a wholly-owned subsidiary of Claymore Group Inc., acts as the Fund's investment adviser pursuant to an advisory agreement with the Trust (the "Advisory Agreement"). The Investment Adviser is a Delaware limited liability company with its principal offices located at 2455 Corporate West Drive, Lisle, Illinois 60532. As of September 30, 2008, Claymore entities have provided supervisory, management, servicing or distribution services on approximately \$13.8 billion in assets. Claymore currently offers closed-end funds, unit investment trusts and exchange-traded funds. Pursuant to the Advisory Agreement, the Investment Adviser manages the investment and reinvestment of the Fund's assets and administers the affairs of the Fund to the extent requested by the Board of Trustees. The Investment Adviser also acts as investment adviser to closed-end and open-end management investment companies.

Pursuant to the Advisory Agreement, the Fund pays the Investment Adviser an advisory fee for the services and facilities it provides payable on a monthly basis at the annual rate of 0.50% of the Fund's average daily net assets.

The Fund's Investment Adviser has contractually agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding interest expenses, a portion of the Fund's licensing fees, offering costs up to 0.25% of the Fund's average net assets, brokerage commissions and other trading expenses, taxes and extraordinary expenses such as litigation and other expenses not incurred in the ordinary course of the Fund's business) from exceeding 0.65% of average net assets per year, at least until December 31, 2011. The offering costs excluded from the 0.65% Expense Cap are: (a) legal fees pertaining to the Fund's Shares offered for sale; (b) SEC and state registration fees; and (c) initial fees paid to be listed on an exchange. The Trust and the Investment Adviser have entered into the Expense Agreement in which the Investment Adviser has agreed to waive its management fees and/or pay certain operating expenses of the Fund in order to maintain the expense ratio of the Fund at or below the Expense Cap. For a period of five years subsequent to the Fund's commencement of operations, the Investment Adviser may recover from the Fund fees and expenses waived or reimbursed during the prior three years if the Fund's expense ratio, including the recovered expenses, falls below the Expense Cap.

In addition to advisory fees, the Fund pays all other costs and expenses of its operations, including service fees, distribution fees, custodian fees, legal and independent registered public accounting firm fees, the costs of reports and proxies to shareholders, compensation of Trustees (other than those who are affiliated persons of the Investment Adviser) and all other ordinary business expenses not specifically assumed by the Investment Adviser.

Approval of Advisory Agreement

A discussion regarding the basis for the Board of Trustees' approval of the Advisory Agreement will be available in the Fund's semi-annual report to shareholders for the period ended February 28, 2009.

Portfolio Management

The portfolio manager who is currently responsible for the day-to-day management of the Fund's portfolio is Chuck Craig, CFA. Mr. Craig has managed the Fund's portfolio since its inception. Mr. Craig is a Managing Director, Research and Development, of the Investment Adviser and Claymore Securities, Inc. and joined Claymore Securities, Inc. in May of 2003. Mr. Craig received a M.S. in Financial Markets from the Center for Law and Financial Markets at the Illinois Institute of Technology. He also earned a B.S. in Finance from Northern Illinois University.

The Statement of Additional Information provides additional information about the portfolio manager's compensation structure, other accounts managed by the portfolio manager and the portfolio manager's ownership of securities of the Fund.

Purchase and Redemption of Shares

General

The Shares will be issued or redeemed by the Fund at net asset value per Share only in Creation Unit size. See “How to Buy and Sell Shares.”

Most investors will buy and sell Shares of the Fund in secondary market transactions through brokers. Shares of the Fund will be listed for trading on the secondary market on the NYSE Arca. Shares can be bought and sold throughout the trading day like other publicly traded shares. There is no minimum investment. Although Shares are generally purchased and sold in “round lots” of 100 Shares, brokerage firms typically permit investors to purchase or sell Shares in smaller “oddlots,” at no per-share price differential. When buying or selling Shares through a broker, you will incur customary brokerage commissions and charges, and you may pay some or all of the spread between the bid and the offered price in the secondary market on each leg of a round trip (purchase and sale) transaction. The Fund will trade on the NYSE Arca at prices that may differ to varying degrees from the daily NAV of the Shares. Given that the Fund’s Shares can be issued and redeemed in Creation Units, the Investment Adviser believes that large discounts and premiums to NAV should not be sustained for long. The Fund will trade under the NYSE Arca symbol FAA, subject to notice of issuance.

Share prices are reported in dollars and cents per Share.

Investors may acquire Shares directly from the Fund, and shareholders may tender their Shares for redemption directly to the Fund, only in Creation Units of 50,000 Shares, as discussed in the “How to Buy and Sell Shares” section below.

Book Entry

Shares are held in book-entry form, which means that no stock certificates are issued. The Depository Trust Company (“DTC”) or its nominee is the record owner of all outstanding Shares of the Fund and is recognized as the owner of all Shares for all purposes.

Investors owning Shares are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all Shares. Participants in DTC include securities brokers and dealers, banks, trust companies, clearing corporations and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of Shares, you are not entitled to receive physical delivery of stock certificates or to have Shares registered in your name, and you are not considered a registered owner of Shares. Therefore, to exercise any right as an owner of Shares, you must rely upon the procedures of DTC and its participants. These procedures are the same as those that apply to any other stocks that you hold in book entry or “street name” form.

How To Buy and Sell Shares

Pricing Fund Shares

The trading price of the Fund's shares on the NYSE Arca may differ from the Fund's daily net asset value and can be affected by market forces of supply and demand, economic conditions and other factors.

The NYSE Arca intends to disseminate the approximate value of Shares of the Fund every fifteen seconds. The approximate value calculations are based on local closing prices and may not reflect events that occur subsequent to the local market's close. As a result, premiums and discounts between the approximate value and the market price could be affected. This approximate value should not be viewed as a "real-time" update of the NAV per Share of the Fund because the approximate value may not be calculated in the same manner as the NAV, which is computed once a day, generally at the end of the business day. The Fund is not involved in, or responsible for, the calculation or dissemination of the approximate value and the Fund does not make any warranty as to its accuracy.

The net asset value per Share for the Fund is determined once daily as of the close of the NYSE, usually 4:00 p.m. Eastern time, each day the NYSE is open for trading. NAV per Share is determined by dividing the value of the Fund's portfolio securities, cash and other assets (including accrued interest), less all liabilities (including accrued expenses), by the total number of shares outstanding.

Equity securities are valued at the last reported sale price on the principal exchange on which such securities are traded, as of the close of regular trading on the NYSE on the day the securities are being valued or, if there are no sales, at the mean of the most recent bid and asked prices. Equity securities that are traded in OTC markets are valued at the NASDAQ Official Closing Price as of the close of regular trading on the NYSE on the day the securities are valued or, if there are no sales, at the mean of the most recent bid and asked prices. Debt securities are valued at the bid price for such securities or, if such prices are not available, at prices for securities of comparable maturity, quality, and type. Short-term securities for which market quotations are not readily available are valued at amortized cost, which approximates market value. Securities for which market quotations are not readily available, including restricted securities, are valued by a method that the Trustees believe accurately reflects fair value. Securities will be valued at fair value when market quotations are not readily available or are deemed unreliable, such as when a security's value or meaningful portion of the Fund's portfolio is believed to have been materially affected by a significant event. Such events may include a natural disaster, an economic event like a bankruptcy filing, a trading halt in a security, an unscheduled early market close or a substantial fluctuation in domestic and foreign markets that has occurred between the close of the principal exchange and the NYSE. In such a case, the value for a security is likely to be different from the last quoted market price. In addition, due to the subjective and variable nature of fair market value pricing, it is possible that the value determined for a particular asset may be materially different from the value realized upon such asset's sale.

Securities trading in a particular country or countries may not take place on all U.S. business days or may take place on days that are not U.S. business days. Changes in valuations on certain securities may occur at times or on days on which the Fund's net

asset value is not calculated and on which the Fund does not effect sales, redemptions and exchanges of its Shares.

Creation Units

Investors such as market makers, large investors and institutions who wish to deal in Creation Units directly with the Fund must have entered into an authorized participant agreement with the distributor and the transfer agent, or purchase through a dealer that has entered into such an agreement. Set forth below is a brief description of the procedures applicable to purchase and redemption of Creation Units. For more detailed information, see “Creation and Redemption of Creation Unit Aggregations” in the Statement of Additional Information.

How to Buy Shares

In order to purchase Creation Units of the Fund, an investor must generally deposit a designated portfolio of equity securities constituting a substantial replication, or a representation, of the stocks included in the Index (the “Deposit Securities”) and generally make a small cash payment referred to as the “Cash Component.” For those Authorized Participants that are not eligible for trading a Deposit Security, custom orders are available. The list of the names and the numbers of shares of the Deposit Securities is made available by the Fund’s custodian through the facilities of the National Securities Clearing Corporation, commonly referred to as NSCC, immediately prior to the opening of business each day of the NYSE Arca. The Cash Component represents the difference between the net asset value of a Creation Unit and the market value of the Deposit Securities. In the case of custom orders, cash-in-lieu may be added to the Cash Component to replace any Deposit Securities that the Authorized Participant may not be eligible to trade.

Orders must be placed in proper form by or through a participant of The Depository Trust Company (“DTC Participant”) that has entered into an agreement with the Trust, the distributor and the transfer agent, with respect to purchases and redemptions of Creation Units (collectively, “Authorized Participant” or “AP”). All standard orders must be placed for one or more whole Creation Units of Shares of the Fund and must be received by the distributor in proper form no later than the close of regular trading on the NYSE Arca (ordinarily 4:00 p.m. Eastern time) (“Closing Time”) in order to receive that day’s closing NAV per Share. In the case of custom orders placed at the request of the Authorized Participant, as further described in the Statement of Additional Information, the order must be received by the distributor no later than one hour prior to Closing Time in order to receive that day’s closing NAV per Share. A custom order may be placed by an Authorized Participant in the event that the Trust permits or requires the substitution of an amount of cash to be added to the Cash Component to replace any Deposit Security which may not be available in sufficient quantity for delivery or which may not be eligible for trading by such Authorized Participant or the investor for which it is acting or any other relevant reason. See “Creation and Redemption of Creation Unit Aggregations” in the Statement of Additional Information.

A fixed creation transaction fee of \$500 per transaction (the “Creation Transaction Fee”) is applicable to each transaction regardless of the number of Creation Units purchased in the transaction. A variable charge of up to four times the Creation Transaction Fee may be imposed to the extent that cash is used in lieu of securities to purchase Creation Units. See

“Creation and Redemption of Creation Unit Aggregations” in the Statement of Additional Information. The price for each Creation Unit will equal the daily NAV per Share times the number of Shares in a Creation Unit plus the fees described above and, if applicable, any transfer taxes.

Shares of the Fund may be issued in advance of receipt of all Deposit Securities subject to various conditions, including a requirement to maintain on deposit with the Trust cash at least equal to 115% of the market value of the missing Deposit Securities. See “Creation and Redemption of Creation Unit Aggregations” in the Statement of Additional Information.

Legal Restrictions on Transactions in Certain Stocks

An investor subject to a legal restriction with respect to a particular stock required to be deposited in connection with the purchase of a Creation Unit may, at the Fund's discretion, be permitted to deposit an equivalent amount of cash in substitution for any stock which would otherwise be included in the Deposit Securities applicable to the purchase of a Creation Unit. For more details, see “Creation and Redemption of Creation Unit Aggregations” in the Statement of Additional Information.

Redemption of Shares

Shares may be redeemed only in Creation Units at their NAV and only on a day the NYSE Arca is open for business. The Fund's custodian makes available immediately prior to the opening of business each day of the NYSE Arca, through the facilities of the NSCC, the list of the names and the numbers of shares of the Fund's portfolio securities that will be applicable that day to redemption requests in proper form (“Fund Securities”). Fund Securities received on redemption may not be identical to Deposit Securities, which are applicable to purchases of Creation Units. Unless cash redemptions are available or specified for the Fund, the redemption proceeds consist of the Fund Securities, plus cash in an amount equal to the difference between the NAV of Shares being redeemed as next determined after receipt by the transfer agent of a redemption request in proper form, and the value of the Fund Securities (the “Cash Redemption Amount”), less the applicable redemption fee and, if applicable, any transfer taxes. Should the Fund Securities have a value greater than the NAV of Shares being redeemed, a compensating cash payment to the Trust equal to the differential, plus the applicable redemption fee and, if applicable, any transfer taxes will be required to be arranged for, by or on behalf of the redeeming shareholder. For more details, see “Creation and Redemption of Creation Unit Aggregations” in the Statement of Additional Information.

An order to redeem Creation Units of the Fund may only be effected by or through an Authorized Participant. An order to redeem must be placed for one or more whole Creation Units and must be received by the transfer agent in proper form no later than the close of regular trading on the NYSE Arca (normally 4:00 p.m. Eastern time) in order to receive that day's closing NAV per Share. In the case of custom orders placed at the request of the Authorized Participant, as further described in the Statement of Additional Information, the order must be received by the transfer agent no later than 3:00 p.m. Eastern time.

A fixed redemption transaction fee of \$500 per transaction (the "Redemption Transaction Fee") is applicable to each redemption transaction regardless of the number of Creation Units redeemed in the transaction. A variable charge of up to four times the Redemption Transaction Fee may be charged to approximate additional expenses incurred by the Trust to the extent that redemptions are for cash. The Fund reserves the right to effect redemptions in cash. A shareholder may request a cash redemption in lieu of securities, however, the Fund may, in its discretion, reject any such request. See "Creation and Redemption of Creation Unit Aggregations" in the Statement of Additional Information.

Distributions

Dividends and Capital Gains. Fund shareholders are entitled to their share of the Fund's income and net realized gains on its investments. The Fund pays out substantially all of its net earnings to its shareholders as "distributions."

The Fund typically earns income dividends from stocks and may also earn interest from debt securities. These amounts, net of expenses, are passed along to Fund shareholders as "income dividend distributions." The Fund realizes capital gains or losses whenever it sells securities. Net long-term capital gains are distributed to shareholders as "capital gain distributions."

Income dividends, if any, are distributed to shareholders annually. Net capital gains are distributed at least annually. Dividends may be declared and paid more frequently to improve Index tracking or to comply with the distribution requirements of the Internal Revenue Code. Some portion of each distribution may result in a return of capital. Fund shareholders will be notified regarding the portion of the distribution that represents a return of capital.

Distributions in cash may be reinvested automatically in additional whole Shares only if the broker through which the Shares were purchased makes such option available.

Distribution Plan and Service Plan

The Board of Trustees of the Trust has adopted a distribution and services plan (the "Plan") pursuant to Rule 12b-1 under the Investment Company Act of 1940, as amended (the "1940 Act"). Under the Plan, the Fund is authorized to pay distribution fees in connection with the sale and distribution of its shares and pay service fees in connection with the provision of ongoing services to shareholders of each class and the maintenance of shareholder accounts in an amount up to 0.25% of its average daily net assets each year.

No 12b-1 fees are currently paid by the Fund, and there are no current plans to impose these fees. However, in the event 12b-1 fees are charged in the future, because these fees are paid out of the Fund's assets on an ongoing basis, these fees will increase the cost of your investment in the Fund. By purchasing shares subject to distribution fees and service fees, you may pay more over time than you would by purchasing shares with other types of sales charge arrangements. Long-term shareholders may pay more than the economic equivalent of the maximum front-end sales charge permitted by the rules of the FINRA. The net income attributable to the Shares will be reduced by the amount of distribution fees and service fees and other expenses of the Fund.

Frequent Purchases and Redemptions

The Fund imposes no restrictions on the frequency of purchases and redemptions. The Board of Trustees evaluated the risks of market timing activities by the Fund's shareholders when they considered that no restriction or policy was necessary. The Board considered that, unlike traditional mutual funds, the Fund issues and redeems its shares at NAV for a basket of securities intended to mirror the Fund's portfolio, plus a small amount of cash, and the Fund's Shares may be purchased and sold on the exchange at prevailing market prices. Given this structure, the Board determined that it is unlikely that (a) market timing would be attempted by the Fund's shareholders or (b) any attempts to market time the Fund by its shareholders would result in negative impact to the Fund or its shareholders.

Fund Service Providers

Claymore Advisors, LLC is the administrator of the Fund.

The Bank of New York Mellon is the custodian and fund accounting and transfer agent for the Fund.

Clifford Chance US LLP serves as counsel to the Fund.

Ernst & Young LLP serves as the Fund's independent registered public accounting firm. The independent registered public accounting firm is responsible for auditing the annual financial statements of the Fund.

Index Provider

Archipelago Holdings Inc. is the Index Provider for the Claymore/NYSE Arca Airline ETF. Arca is not affiliated with the Trust, the Investment Adviser or the distributor. The Investment Adviser has entered into a license agreement with Arca to use the Index. The Fund is entitled to use the Index pursuant to a sub-licensing arrangement with the Investment Adviser.

Disclaimers

The "NYSE Arca Global Airline Index" is a service mark of the NYSE Group, Inc. ("NYSE") and Arca and has been licensed for use by the Investment Adviser. The Fund is not sponsored, endorsed, sold or promoted by the NYSE or Arca and neither NYSE nor Arca makes any representation or warranty regarding the Trust or the Fund or the ability of the Index to track general stock market performance.

Neither NYSE nor Arca makes any express or implied warranties of merchantability or fitness for a particular purpose with respect to the Index or any data included therein. In no event shall NYSE or Arca have any liability for any special, punitive, indirect, or consequential damages (including lost profits), even if notified of the possibility of such damages.

The Investment Adviser does not guarantee the accuracy and/or the completeness of the Index or any data included therein, and the Investment Adviser shall have no liability for any errors, omissions or interruptions therein. The Investment Adviser makes no warranty, condition or representation express or implied, as to results to be obtained by the Fund, owners of the Shares of the Fund or any other person or entity from the use of the Index or any data included therein. The Investment Adviser makes no express or implied warranties, representations or conditions, and expressly disclaims all warranties or conditions of merchantability or fitness for a particular purpose or use and any other express or implied warranty or condition with respect to the Index or any data included therein. Without limiting any of the foregoing, in no event shall the Investment Adviser have any liability for any special, punitive, direct, indirect or consequential damages (including lost profits) arising out of matters relating to the use of the Index or any data included therein even if notified of the possibility of such damages.

Federal Income Taxation

As with any investment, you should consider how your investment in Shares will be taxed. The tax information in this Prospectus is provided as general information. You should consult your own tax professional about the tax consequences of an investment in Shares.

Unless your investment in Shares is made through a tax-exempt entity or tax-deferred retirement account, such as an IRA plan, you need to be aware of the possible tax consequences when:

- The Fund makes distributions,
- You sell your Shares listed on the NYSE Arca, and
- You purchase or redeem Creation Units.

Taxes on Distributions

Dividends from net investment income, if any, are declared and paid annually. The Fund may also pay a special distribution at the end of the calendar year to comply with federal tax requirements. In general, your distributions are subject to federal income tax when they are paid, whether you take them in cash or reinvest them in the Fund. Dividends paid out of the Fund's income and net short-term gains, if any, are taxable as ordinary income. Distributions of net long-term capital gains, if any, in excess of net short-term capital losses are taxable as long-term capital gains, regardless of how long you have held the Shares.

Long-term capital gains of non-corporate taxpayers are generally taxed at a maximum rate of 15% for taxable years beginning before January 1, 2011. Thereafter, without further Congressional action, that rate will return to 20%. In addition, some ordinary dividends declared and paid by the Fund to non-corporate shareholders may qualify for taxation at the lower reduced tax rates applicable to long-term capital gains, provided that holding period and other requirements are met by the Fund and the shareholder.

Distributions in excess of the Fund's current and accumulated earnings and profits are treated as a tax-free return of capital to the extent of your basis in the Shares, and as capital gain thereafter. A distribution will reduce the Fund's net asset value per Share and may be taxable to you as ordinary income or capital gain even though, from an investment standpoint, the distribution may constitute a return of capital.

If more than 50% of the Fund's total assets at the end of its taxable year will consist of foreign stock or securities, the Fund will elect to "pass through" to its investors certain foreign income taxes paid by the Fund, with the result that each investor will (i) include in gross income, as an additional dividend, even though not actually received, the investor's pro rata share of the Fund's foreign income taxes, and (ii) either deduct (in calculating U.S. taxable income) or credit (in calculating U.S. federal income), subject to certain limitations, the investor's pro rata share of the Fund's foreign income taxes. The Fund currently does not expect more than 50% of its total assets to consist of foreign stock or securities.

If you are not a citizen or permanent resident of the United States, the Fund's ordinary income dividends (which include distributions of net short-term capital gains) will generally be subject to a 30% U.S. withholding tax, unless a lower treaty rate applies or unless such income is effectively connected with a U.S. trade or business carried on through a permanent establishment in the United States. For taxable years of the Fund

beginning before January 1, 2010, the Fund may, under certain circumstances, designate all or a portion of a dividend as an “interest-related dividend” or a “short-term capital gain dividend.” An interest-related dividend that is received by a nonresident alien or foreign entity generally would be exempt from the 30% U.S. withholding tax, provided that certain other requirements are met. A “short-term capital gain dividend” that is received by a nonresident alien or foreign entity generally would be exempt from the 30% U.S. withholding tax, unless the foreign person is a nonresident alien individual present in the United States for a period or periods aggregating 183 days or more during the taxable year. Prospective investors are urged to consult their tax advisors regarding the specific tax consequences discussed above.

Dividends and interest received by the Fund may give rise to withholding and other taxes imposed by foreign countries. Tax conventions between certain countries and the United States may reduce or eliminate such taxes.

By law, the Fund must withhold a percentage of your distributions and proceeds if you have not provided a taxpayer identification number or social security number. The backup withholding rate for an individual is currently 28%.

Taxes on Exchange-Listed Shares Sales

Currently, any capital gain or loss realized upon a sale of Shares is generally treated as long-term capital gain or loss if the Shares have been held for more than one year and as short-term capital gain or loss if the Shares have been held for one year or less. The ability to deduct capital losses may be limited.

Taxes on Purchase and Redemption of Creation Units

An authorized purchaser who exchanges equity securities for Creation Units generally will recognize a gain or a loss. The gain or loss will be equal to the difference between the market value of the Creation Units at the time and the exchanger's aggregate basis in the securities surrendered and the Cash Component paid. A person who exchanges Creation Units for equity securities will generally recognize a gain or loss equal to the difference between the exchanger's basis in the Creation Units and the aggregate market value of the securities received and the Cash Redemption Amount. The Internal Revenue Service, however, may assert that a loss realized upon an exchange of securities for Creation Units cannot be deducted currently under the rules governing "wash sales," or on the basis that there has been no significant change in economic position. Persons exchanging securities should consult their own tax advisor with respect to whether the wash sale rules apply and when a loss might be deductible.

Under current federal tax laws, any capital gain or loss realized upon redemption of Creation Units is generally treated as long-term capital gain or loss if the Shares have been held for more than one year and as a short-term capital gain or loss if the Shares have been held for one year or less.

If you purchase or redeem Creation Units, you will be sent a confirmation statement showing how many and at what price you purchased or sold Shares.

The foregoing discussion summarizes some of the possible consequences under current federal tax law of an investment in the Fund. It is not a substitute for personal tax advice. You may also be subject to state and local taxation on Fund distributions and sales of Fund Shares. Consult your personal tax advisor about the potential tax consequences of an investment in Fund Shares under all applicable tax laws.

Other Information

For purposes of the 1940 Act, the Fund is treated as a registered investment company. Section 12(d)(1) of the 1940 Act restricts investments by investment companies in the securities of other investment companies, including shares of the Fund. Registered investment companies are permitted to invest in the Fund beyond the limits set forth in Section 12(d)(1) subject to certain terms and conditions set forth in an SEC exemptive order issued to the Trust, including that such investment companies enter into an agreement with the Fund.

Disclosure of Portfolio Holdings

A description of the Trust's policies and procedures with respect to the disclosure of the Fund's portfolio securities is available in the Fund's Statement of Additional Information.

Financial Highlights

Because the Shares of the Fund are newly offered, there is no financial information available for the Shares as of the date of this prospectus.
